

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

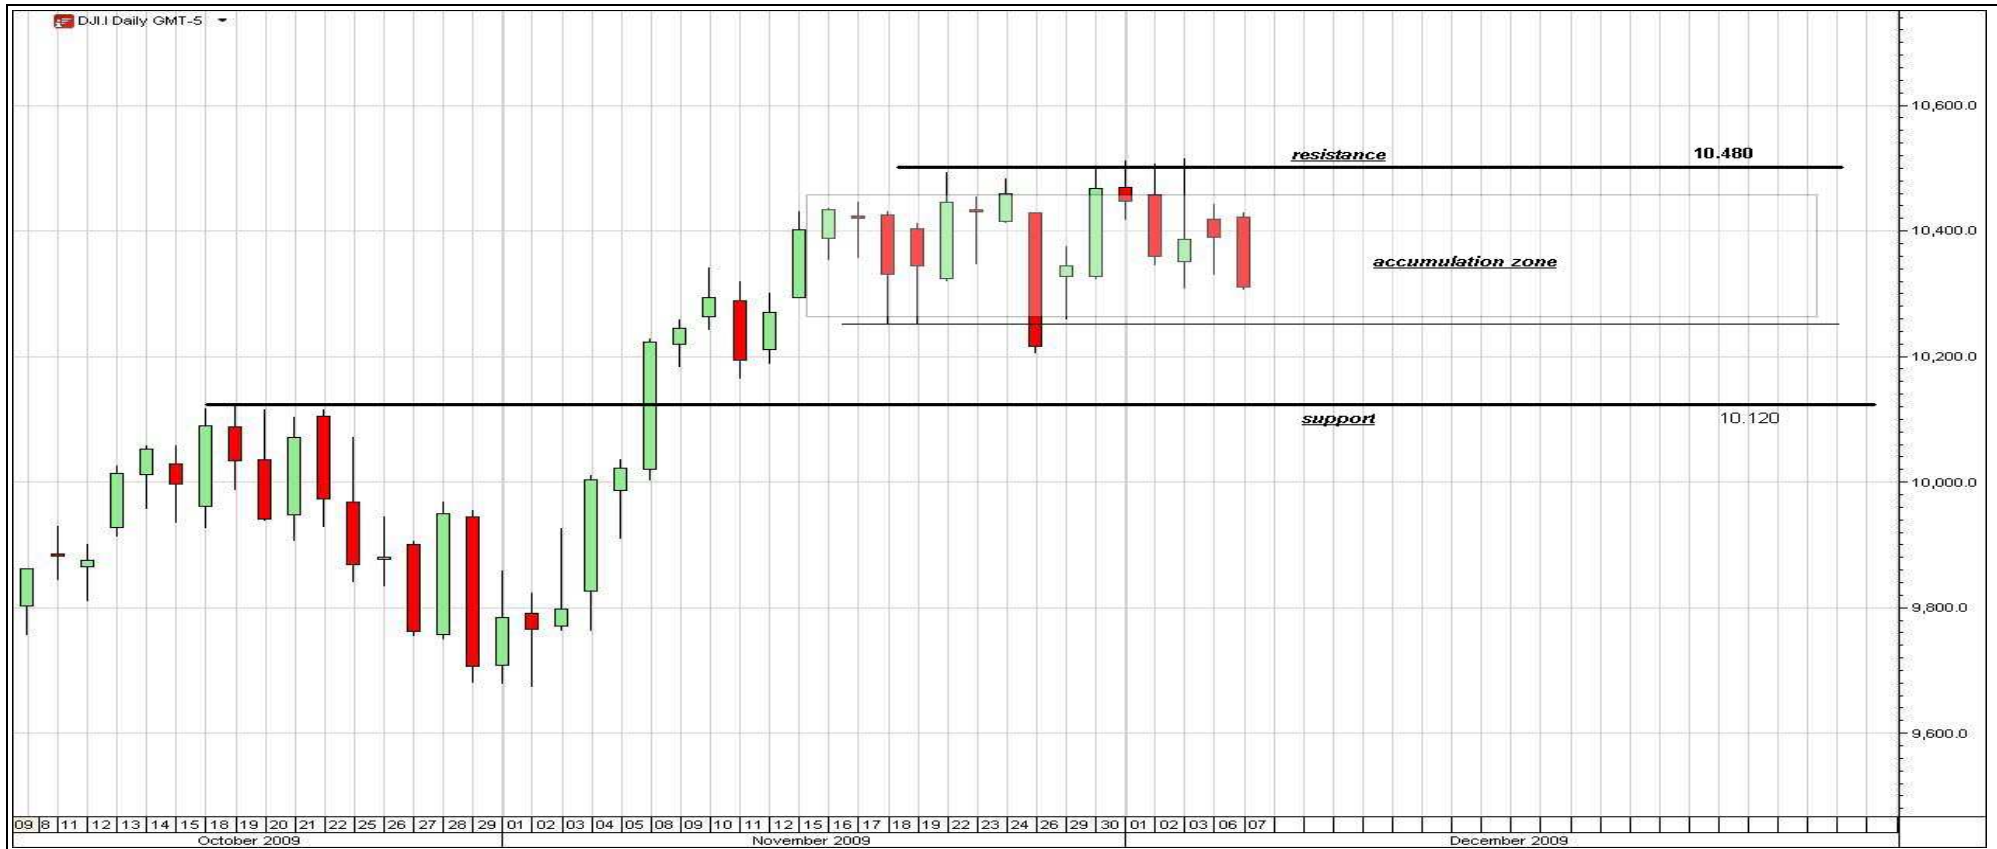

With red arrows is presented our prediction for today!

Now we are near our yesterday support (10.290). During today's session expect to see a pullback from it. Dow should grow a little bit after he will touch it. After that, especially during second part of the day expect to see another tentative to break the support. Good target under this support is 10.220. Reconsider quick long trades only above 10.390.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

Now we are in a strong consolidation zone between 10.120-10.480. Between these levels Dow makes up and down moves. Buy near support and sell near resistance and reverse only when Dow manages to break these levels for at least 50 pips. Only then try a break out trade. *Now Dow retreats from resistance and it is heading to support.*
