

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

with red arrows is presented our prediction for today!

For today we see some chances for a rising market. Especially in the second part of the day. Do not try long trades under 8.100. From there try only quick short trades with 30-50 pips target. Above 8.100 look for 8.170-8.200 to be a good target during this day.
