Some accumulation during first part of the day and upward moves in the second part. Look for 8.640 to be an inflexion point. If breaks under then try only short trades. If manage to break 8.700 then 8.860 should be next significant target...

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

with red arrows is presented our prediction for next days!

We saw more than a "little" recovery of the market. Dow managed to break significant resistance. Now we have a strong one at 8.700. If will break it then look for more upward moves (to 8.860). If not expect some downward moves to 8.400 at least.
