

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

with red arrows is presented our prediction for today!

Expect to see a little bit of recovery in the first part followed by some more downward moves. Above resistance zone (8.420-8.390) do not consider short anymore. Try a quick long trade for 30-50 pips if manages to stay above. After the downward resumes under 8.390 expect 8.320.
