

**Our prediction:**

**What really happened:**

**Our comments**

**Perfect forecast for yesterday, AGAIN!** Look at what we said yesterday, before the market starts: *"It's possible to see some accumulation around 9.070 (min 9.010, max 9.100) with ups and downs. Buy near the support and sell near the top."* All you had to do was to collect more than 200 pips profit from the market with buy orders at 9.020 and SL under 9.000 and sell orders at 9.070 and SL above 9.100 exactly like we said!
