Our prediction:

What really happened:

Our comments

Because of a very good news , at the beginning of the trading session we had an unexpected upward move. It stopped like we predicted at our resistance zone. After that our description matched perfectly. We had an accumulation and then a downward move back to 8.750-8.700 zone. -75 pips from a short opened at the beginning, and a +75 pips profit from a SHORT took in the second part of the day.
