

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

with red arrows is presented our prediction for today!

For today expect to see a little up market at beginning. Then for 2-3 hours it's possible to see some declines. They shouldn't be significant, but should appear. In the afternoon (after 1 PM New York time) look for upward moves. Follow the markets if break our resistance zone for 8.600 first target and maybe 8.680 second target (very few chances).

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

with red arrows is presented our prediction for next days!

We saw all the move down from 8.800 to 8.450 exactly like we said. We hope you got a big slice from this move.

From now we should see a little resistance near 8.400-8.430. Dow should try a recovery to 8600 and then a little down again to supports. Next week will see. Follow the market with short trades again if manages to break 8.400
