

## Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

### Today's Description

with red arrows is presented our prediction for today!

For today we should have two separate moves. First we should see some upward moves to 8.420. Follow the market if manages to break this level (Dow should bounce up and down near that level) after that in the afternoon a downward move should begin and should move Dow between 50 and 100 pips down from the highest point of the morning. This downward move is possible to continue tomorrow too.
