Time Frame: 30 minutes

Today's Description

with red arrows is presented our prediction for today!

After Dow broke support it should went lower to the next support (8.220) exactly like we anticipated even from yesterday. For now it's a bit late if you didn't already entered like we said on daily forecast from yesterday with a SHORT from 8.420 and 8.220 target. However, we should see some downward move for today. Try a quick short trade if manages to break 8.220. During this day we should see a recovery to resistance zone also.
