

**Dow – 30 minutes**

**Today's Description**

You could have went for long first for some profit. Then certainly short from resistance for +100 pips approximately. Those are trade signals with Stochastic (5,3,3) ( for that see articles about technical analysis at <http://www.futureanalyzer.com/solutions.php> ) following our scenario for yesterday... This is not only a technical analysis. Our scenarios are made with the help of Gann methods and our special way to interpret astrological moments.
