

**Dow – 30 minutes**

<p><b>Today's Description</b></p>	<p>First trade should have been a little long from 6850 support... then a short from 6950 like in our scenario. For first +50-70 pips profit, for second -50-70 pips profit. When Dow broke resistance at 7020 a long could have been opened. With a nice profit at the end</p>
