

## Our yesterday's prediction:

### Today's Description

In above picture will post our last day analysis for Dow Jones on 30 minutes time frame. It is exactly our best scenario from yesterday. On the next page the chart will be filled with live data from yesterday's end session and we'll make a little analysis on it.

**Dow Jones live chart and trading ideas based on our yesterday's scenario:**

**Today's Description**

Our scenario was for a little long to 7250 – 7300 area and then a decline to 7150 support. The up move wasn't very impressive but the short trade was very ok and you could took at least 50 pips profit.
