

Our yesterday's prediction:

What really happened:

Our comments

Our scenario was for a short to 7400, a little retreat, then another short to 7350. Unfortunately this didn't happened, Dow grew to 7500 and then to 7600 and more... So, we have a stop loss from 7400 to 7500, and a profit from 7500 to 7600. If you managed to trade better, good for you!
