

Our prediction:

What really happened:

Our comments

Our analysis for today was an accumulation between 7600 – 7780... And this is exactly what happened! You could went for a long from 7680-7700 for 50 pips profit ... then a short from the resistance (witch we predicted perfectly) for 100 pips to the end of the day... +150 pips total profit for today...
