

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

with red arrows is presented our prediction for today!

During night we saw some strong declines to 8400 and then to 8310 like we said in our yesterday analysis for DAY time frame. For now we should see some sort of support around 8310. If not, next strong support should be 8260. Today is a bear day... It's possible to see some little recovery in the first 2-3 hours but then downward moves should resume. Sell highs.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

with red arrows is presented our prediction for next days!

Expect for some up and down moves (consolidation) between 8710 – 8260 for some days.. If manage to break 8260 then look for some important declines. 8310 was hit. Lets see if 8260 resist and then will see. For tomorrow, 14 may we see dome upward moves all day...
