

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

with red arrows is presented our prediction for today!

This up move during night was perfectly logic. It is possible to see some further up moves but not too much (8410 should be a very strong resistance today again). After this, especially in the afternoon expect some declines. 8260 and 8200 should be a good target. Next should be 8120. Do not consider short trades anymore if DOW manage to break and stays above 8410. Under 8410 it should be ok.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

with red arrows is presented our prediction for next days!

Nice triangle we see there. With a low around 8100-8150 and a high around 8400-8450. From here we should go down to 8120-8100 and then 8000 points.
