What really happened:

Our comments

Dow went up from 8350 to 8410. Then for 2 hours stayed there... It didn't decline under 8400 and went to 8500. So you could went for a LONG for 50 pips. A SHORT trade should have been avoided because DOW didn't break under 8400 any more. Our big resistance was broke so something important have been changed.
