

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

with red arrows is presented our prediction for today!

Today and tomorrow will have important things from astrological point of view! Things that happens one at 10-11 years. And this things today should be a little positive. Look for some little declines around 8450 and then some upward moves. Again, if DOW manage to break under 8410 do not consider long anymore (try quick short trades – scalp the market). Above this level try some long trades for 8550-8600. But do not expect to much up move. Tomorrow should be a very strong negative day! And the decline could start from this evening .
