

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

with red arrows is presented our prediction for today!

Like we said yesterday our second target is 8260. In first part of the day we should see some declines to that point. Then expect to see what will happen. If market will try to break that support then look for 8200-8170. If not then in the afternoon expect to see some recovery as well to 8300 and above.
