*Time Frame: 30 minutes*

### Today's Description

with red arrows is presented our prediction for today!

For today we should see some little upward moves followed by some fast and sudden declines. Between 11 -14 EDT (Eastern Daylight Time) expect for some sudden moves. These moves should be down to around 8220 and possibly 8150. After that some recovery is very possible. Follow the market with some breakout trades if it manages to break 8220 or 8340.
