Today we have support zone near 9.740 and resistance zone at 9.880. Between this levels DOW should fluctuate today. Try short trades near resistance and buy near support zone with SL above/under them. If manages to cross resistance then follow the market for at least 50 pips profit.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

After a retreat to 9.800 we saw a fall again to 9.700.

Now look for a break of resistance (9.870-9.890). If manages to break it, then Dow will enter again in the accumulation zone and you should trade accordantly. Under 9.700 again 9.570 is a good target.
