

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

For today we see strong resistance at 10.380 and first support at 10.260. The sentiment is still up so Dow can touch the resistance during live session... After that some little downward moves are possible (reverse and go for quick long trades only if DOW manages to break the resistance).
