

**Our prediction:**

**What really happened:**

**Our comments**

We said yesterday: "For today 10.220 can be a pivot ... Support is at 10.120 and resistance between 10.340-10.380 zone... Look for some upward and downward moves between the pivot line." Like we can saw a very good forecast... LONG for 30 and SORT for 50 pips for yesterday...
