Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

We saw our last two targets hit... After that some accumulation between 10.120 and 10.390 developed.

Now, this accumulation is still in progress so trade accordingly (buy near the support and sell near the top with close SL) and be prepared to see a break of resistance. When DOW breaks it, next good target will be 10.540.
