Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

Today's support is at 10.270 and resistance at 10.390 and 10.440. Only a break above 10.390 will indicate some upward moves. During live session we would expect some mixed evolution between 10.400 – 10.300.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

We saw our last two targets hit... After that some accumulation between 10.120 and 10.390 developed.

Now, this accumulation is still in progress so trade accordingly (buy near the support and sell near the top with close SL) and be prepared to see a break of resistance. When DOW breaks it, next good target will be 10.540.
