

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

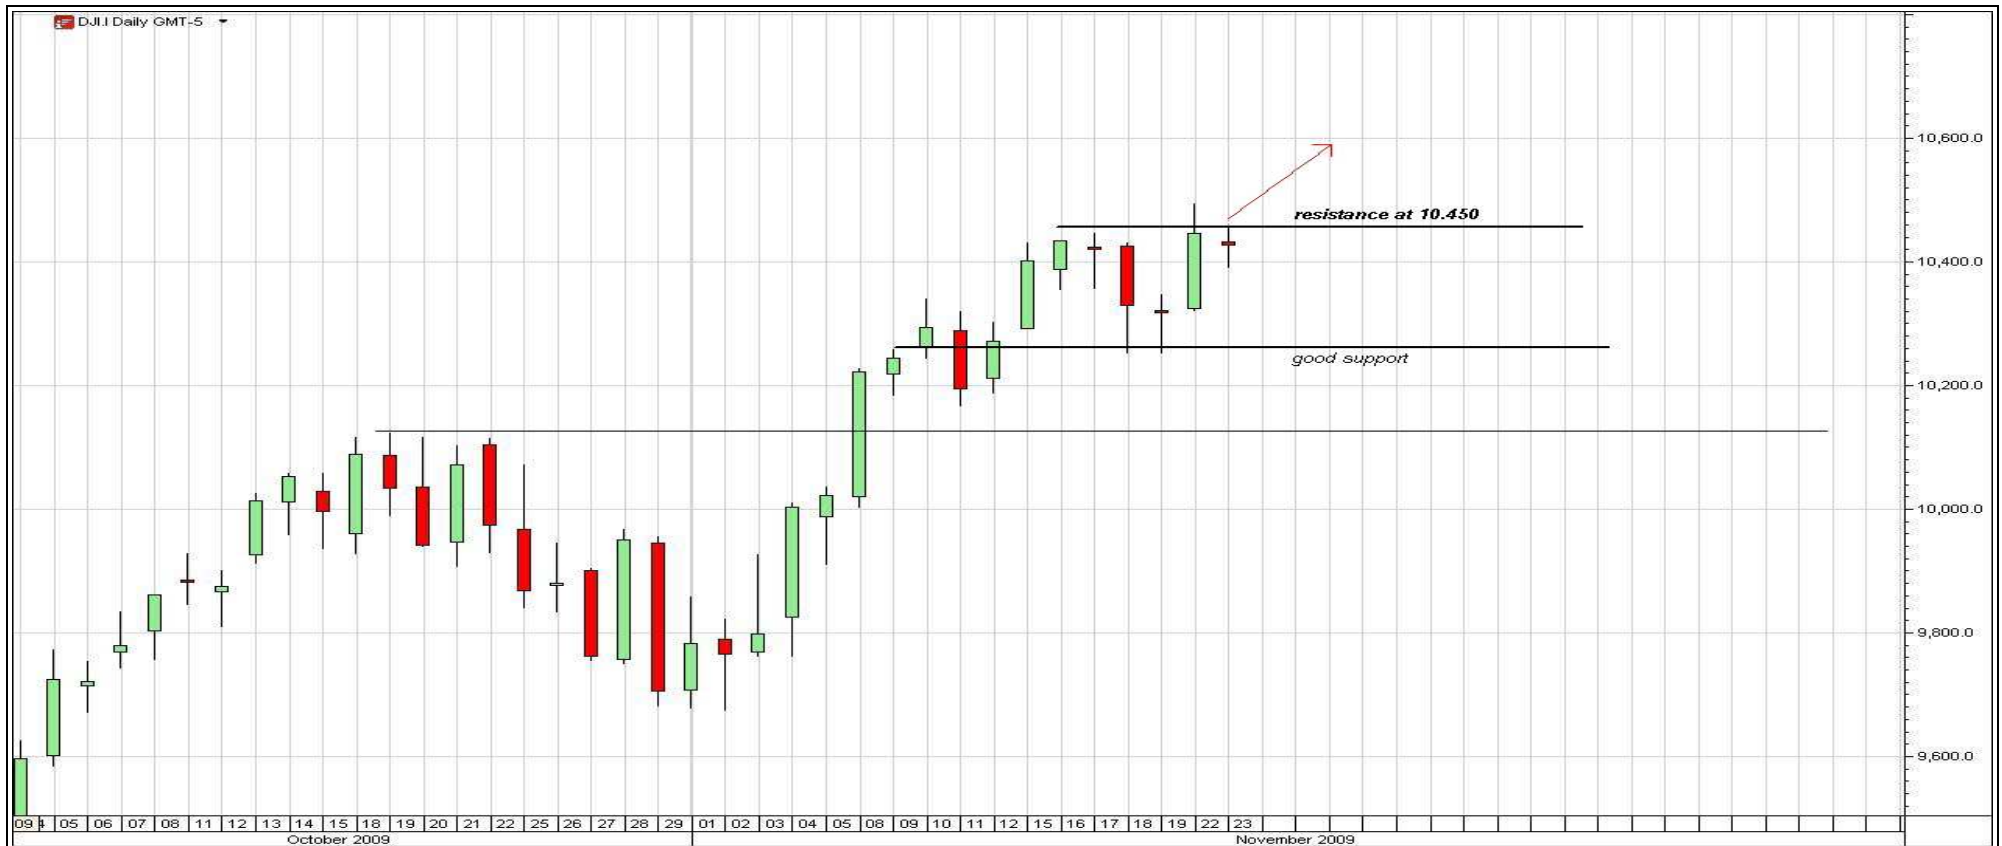

With red arrows is presented our prediction for today!

10.450 can be for today a significant pivot line. Dow should try to break it during live session. Support is at 10.390 – a break of this can indicate some opportunity to enter short.

For today's session we expect to see some new highs from Dow. After that some declines in the end of the session are possible.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

10.450 is now the strong resistance. Only a break of this level will indicate again a bull sentiment.

We had a small negative trend. We'll have to see if the resistance is really broke for confirmation of changing the trend... A good target above the resistance is 10.540 and 10.620.
