Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

10.450 seem now to be a good resistance. Dow should try to make some new highs during today's live session. A good target can be 10.540.

Because tomorrow market will be closed and Friday only half of the session will be live consider possible downward moves in the late session – because traders may want to close some positions.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

10.450 is now the strong resistance. Only a break of this level will indicate again a bull sentiment.

We had a small negative trend. We'll have to see if the resistance is really broke for confirmation of changing the trend... A good target above the resistance is 10.540 and 10.620.
