

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

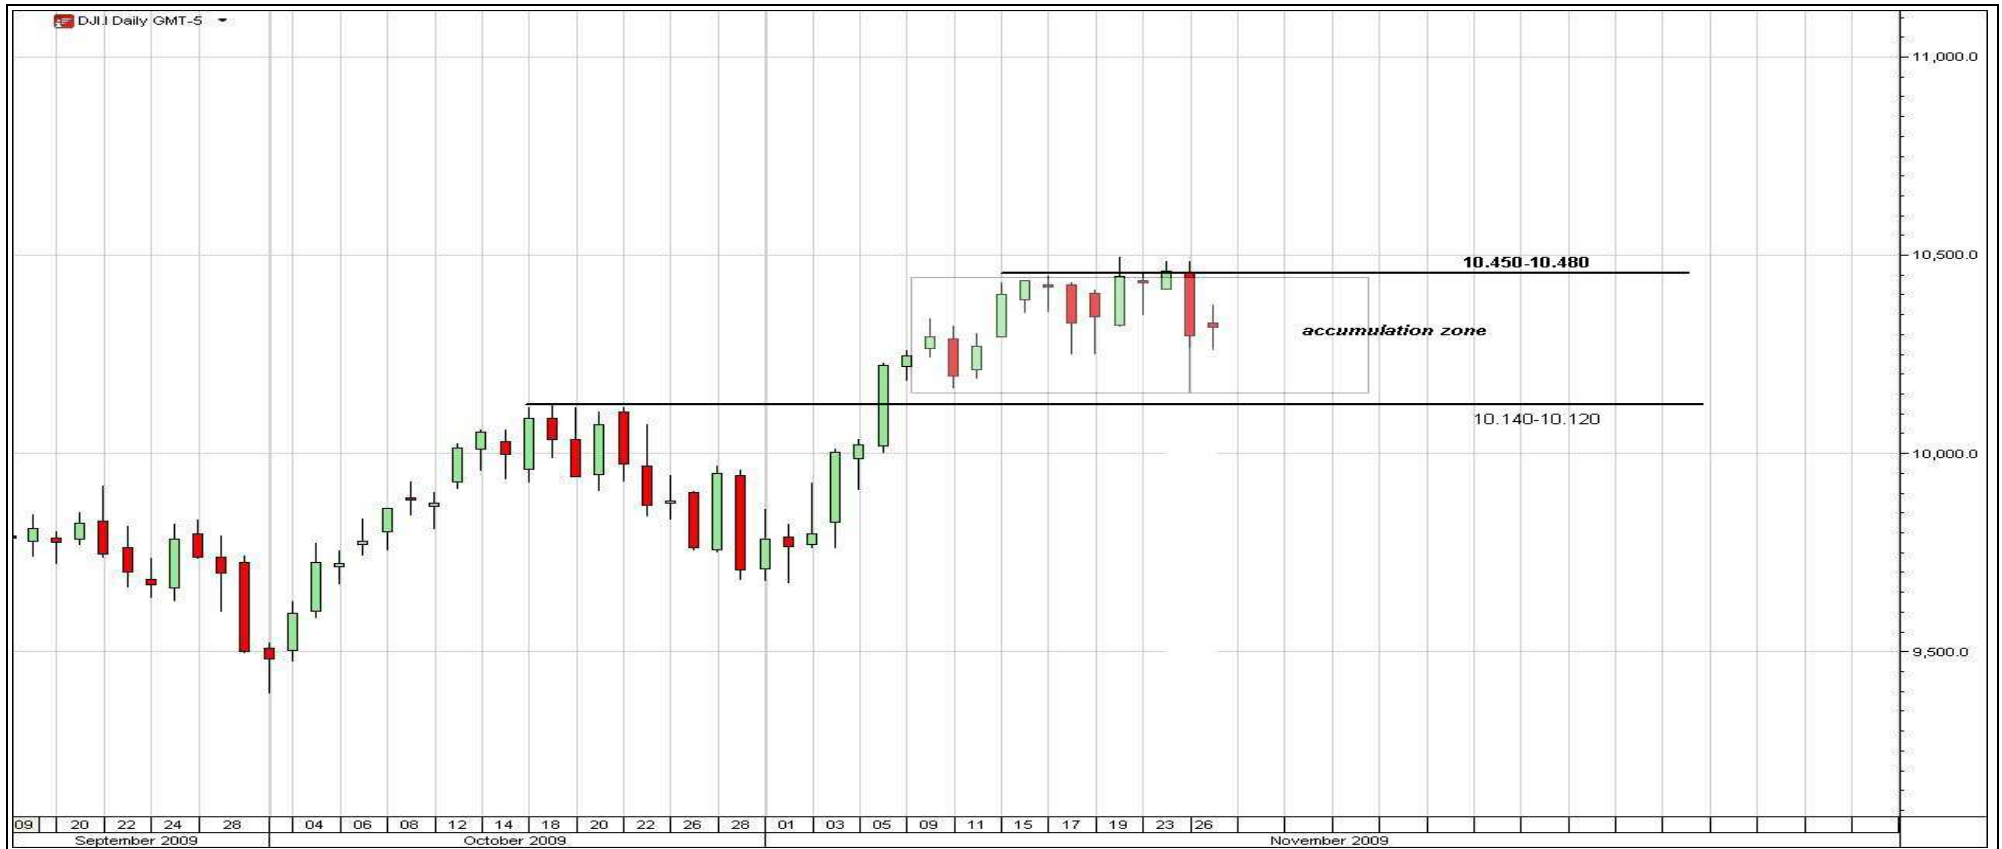

With red arrows is presented our prediction for today!

Last two days we assisted at a strong speculative move based on the fact that very few traders were live (because of Thanksgiving day and because of a very small liquidity). Markets recovered during live session a very significant part of the decline.

For today we have some short signals during especially in the first part of the session. Support is at 10,270 and 10,230.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

Like we said some days ago, now we are in a consolidation zone between 10.120-10.480. Between these levels Dow makes up and down moves. Buy near support and sell near resistance and reverse only when Dow manages to break these levels for at least 50 pips. Only then try a break out trade.
