

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

**Today's Description**

With red arrows is presented our prediction for today!

9.910 is the resistance for today. 9.850 is the first support... Between this levels is not very safe to trade because fluctuation could be very narrow. We expect, after some little upward move, a downward move to develop. Under 9.850 strong support is 9.800 and 9.730. If manages to break 9.910 then consider quick LONG trades for 30-50 pips.

## Dow Jones Industrial Average (DJI)

Time Frame: DAY

### Today's Description

With red arrows is presented our prediction for next days!

Dow broke 9.850 so now you should be LONG with 10.000 target and SL near Break Even (BE). At 10.000 close half of positions and wait with the rest.

Our analysis gives some short signals but until Dow shows some weak signs, you should be with the current trend. Consider SHORT under 9.800.
