

## Dow Jones Industrial Average (DJI)

*Time Frame: 30 minutes*

### Today's Description

With red arrows is presented our prediction for today!

DOW went almost to 10.000 and reversed. During today's session we have 10.000 for a strong resistance and 9.910 for the first support (9.850 is the second). Looking at our today's signs we should expect for some downward moves at least to retest first support. But looking at 10.000 which is a very psychological level we advice you to be vigilant. At any break or sign to break 10.000 try quick LONG trades to follow the market above this level...

## Dow Jones Industrial Average (DJI)

Time Frame: DAY

### Today's Description

With red arrows is presented our prediction for next days!

**Dow broke 9.850 so now you should be LONG with 10.000 target and SL near Break Even (BE). At 10.000 close half of positions and wait with the rest.**

Our analysis gives some short signals but until Dow shows some weak signs, you should be with the current trend. Consider SHORT under 9.800.
