Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

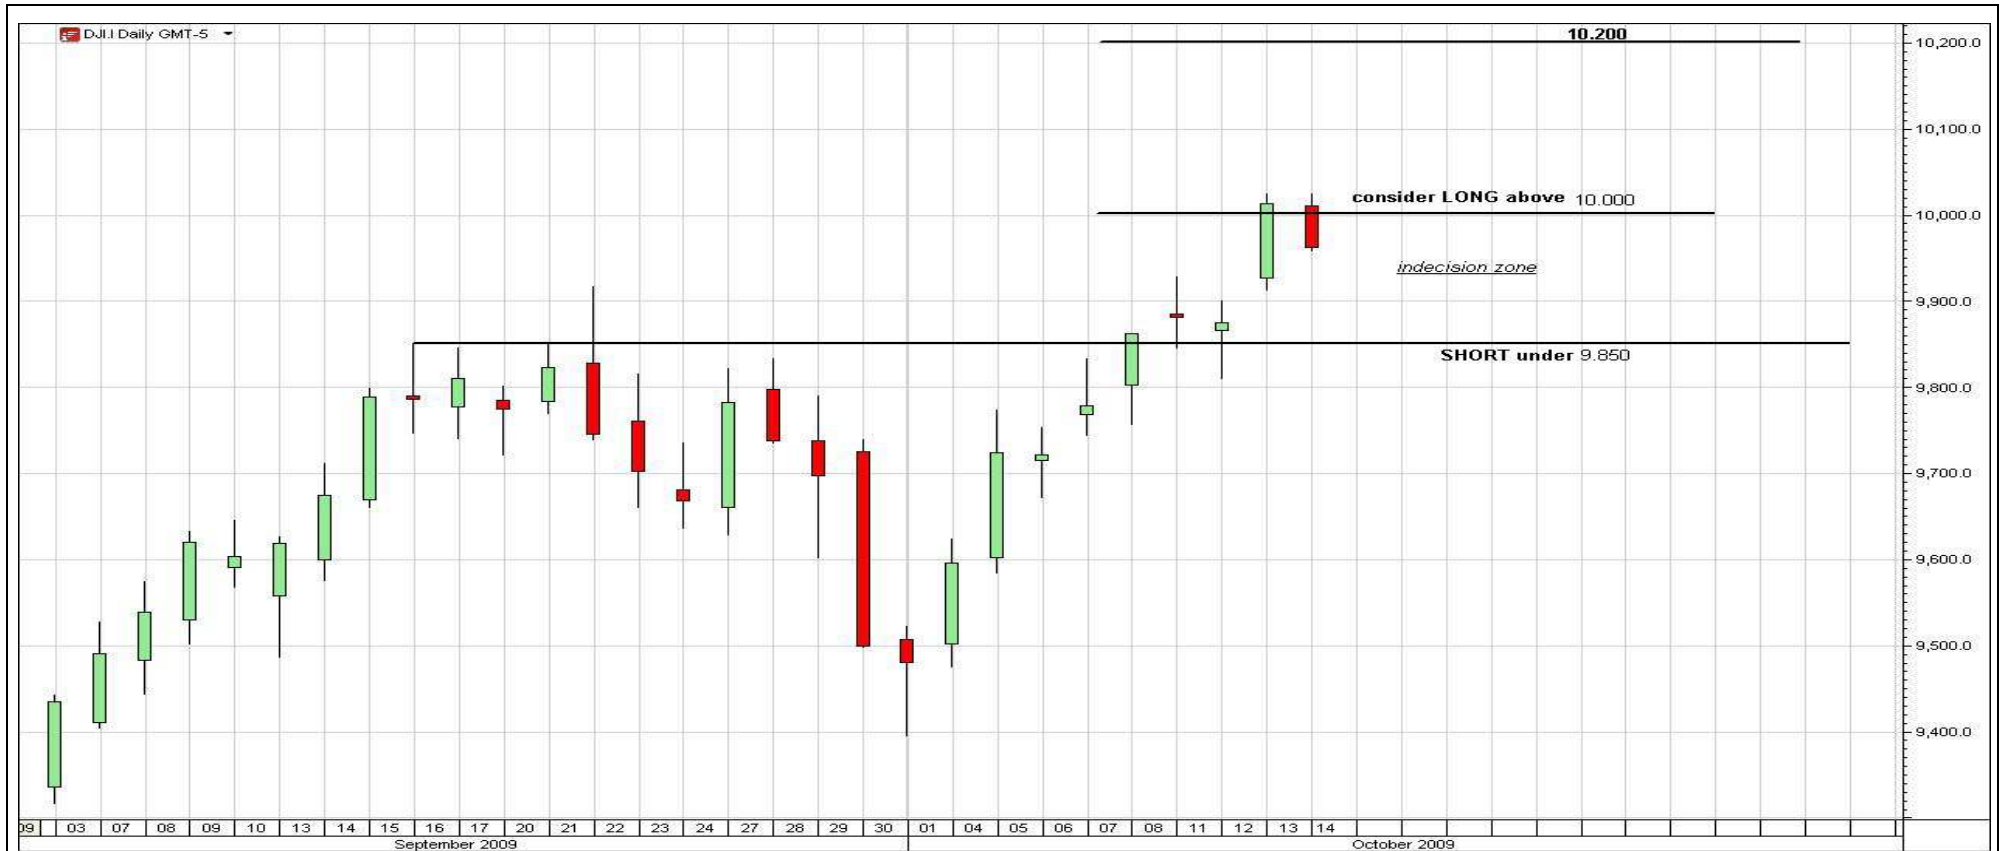

With red arrows is presented our prediction for today!

For today consider some fluctuation under 10.020 for the DOW. Maybe a retest of 10.000 during live session but some downward moves too to support. Reverse and try quick LONG trades only if manages to break 10.020.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

The trend is still up and if you followed our suggestion now you closed half of position at 10.000 and moved SL on BE at 9.850. Expect 10.200...

General picture is that between 10.000 and 9.850 is the indecision zone. Try only quick trades. Follow the market in the direction of the break... when breaks..
