Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

Because of the good news released in this morning, it's possible to see more upward moves during first part of the day. Anyway, 9.700 should represent a strong resistance. After that some downward moves (of at least 50 pips) are possible.

With red arrows is presented our prediction for today!

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

9.650-9.700 should be a very strong resistance. Dow can try several more times to break this level but it's very possible that it will not succeed and because of that we can see some downward moves back to support level (9.250).

With red arrows is presented our prediction for next days!
