

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

For today we have signs for some downward moves, especially during noon. So, look for some SHORT trades but be careful at 9.820-9.840 zone. If Dow manages to break it then try again some upward moves to 9.900 and 10.000 finally. Support is at 9.700 (and a good target).

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

9.650-9.700 had been a resistance zone for 5 days now. Dow tried some downward moves to 9.450 but had stopped only at 9.500 on Monday. Right now, because Dow managed to break 9.700 we are a little conservative about shorting the market. Now try some quick trade based on the intraday moves. Only when Dow will break again 9.650-9.600 zone look for a consistent SHORT trade!
