Today seems to be a bullish day, again. After a weak start (some downward moves of 40-50 pips) we should see another upward moves back to 9.850 and maybe more. Strong resistance is now at 9.850. When Dow will break it look for 10.000! Support is at 9.750 and 9.700.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

9.650-9.700 had been a resistance zone for 5 days now. Dow tried some downward moves to 9.450 but had stopped only at 9.500 on Monday. Right now, because Dow managed to break 9.700 we are a little conservative about shorting the market. Now try some quick trade based on the intraday moves. Only when Dow will break again 9.650-9.600 zone look for a consistent SHORT trade!
