Today's Description

With red arrows is presented our prediction for next days!

9.850 seems to be some sort of top right now. Only above it reconsider LONG trades with 10.000 target. Under this level (9.850), if today manages to end the day down, expect some downward moves from here. First support (and a good target) is at 9.650, second is at 9.450.
