

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

9.850 seems to be again, a strong resistance. 9.780 is for today first support (second is at 9.720). During today's session we should see some up and down moves between this levels. Even if Dow manages to break 9.850 it should be decisive (only a false break). So, again, like yesterday, buy near support and sell near top. Try quick break out trades if Dow manages to break any of this levels (with 40-50 pips target).

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

9.850 seems to be some sort of top right now. Only above it reconsider LONG trades with 10.000 target. Under this level (9.850), consider some sort of accumulation (between 9.650-9.850). So, SELL near the top and BUY near the bottom.
