*Time Frame: 30 minutes*

### Today's Description

With red arrows is presented our prediction for today!

It's a difficult day today... We say this because today we have signals for some downward moves... But also we are near 9.850 a very strong resistance (above this level the space is open)... So, for today it's possible to see some little breaks of the 9.850 but also some downward moves under 9.800. Sell more if manages to break 9.780. If goes above 9.880-9.890 then don't look for short trades anymore and follow the market!

## Dow Jones Industrial Average (DJI)

*Time Frame: DAY*

### Today's Description

With red arrows is presented our prediction for next days!

9.850 seems to be some sort of top right now. Only above it reconsider LONG trades with 10.000 target. Under this level (9.850), consider some sort of accumulation (between 9.650-9.850). So, SELL near the top and BUY near the bottom.
