We should see same quiet day... after some fluctuation near 9.780 we should see another upward moves to our resistance (9.850). Reverse and try some quick SHORT trades if Dow manages to break first support.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

9.850 seems to be some sort of top right now. Only above it reconsider LONG trades with 10.000 target. Under this level (9.850), consider some sort of accumulation (between 9.640-9.850). **So, SELL near the top and BUY near the bottom!**

From support, from 9.650-9.660 you should be LONG right now with SL already moved at Break Even! (above 9.800 close half of positions and move the rest on Break Even).
