

Moon Void of Course Periods

We will explain what moon void of course is, the influence this astrologic event has over people and what happens during these periods on the financial markets. We will study the graphics for DOW and E-mini S&P 500 to find the rules. We will then draw the conclusions to help us make financial predictions.

1. What means moon void of course?

It is a very important aspect for astrological forecasting especially for daily predictions, an aspect that should be always taken into consideration. The moon void of course period starts after the Moon makes its last major aspect in a sign and ends just before the Moon enters the next sign. This could take from a few minutes to even two days.

We can consider that the Moon takes a vacation. The Moon is like a transceiver. It transforms and transmits the subtle vibrations of all other planets to the Earth, influencing our decisions, reactions and lives. It also sends back in the Universe our feelings, thoughts and emotions.

When the Moon, in its void of course, receives no signal from the other planets, it has nothing to transmit to the Earth. This is why during this period we are feeling detached from reality, unable to make decisions, drifting into an unknown space, making errors in our judgment.

How should we act during the moon void of course period?

We should do exactly what the Moon does: take a vacation! We should take our time to rest, meditate on our life, read, listen to music and dedicate our time to spiritual activities. We should by any means avoid making important decisions, buying important items, signing contracts, going to job interviews.

Every action we perform has a risk of failing or of needing redoing. The decisions we make can be wrong, the things we buy prove to be useless or broken and our investments go bankrupt. The business trips are a mess and the agreements do not finalize. The relationships started in this period are meant to fail or they will bring suffering and tears. So don't get married during the moon void of course times.

Subconsciously we are still feeling the last energetic vibration the Moon transmitted to us although it is now void of course and preparing to enter fresh into a new sign and to receive and transmit future aspects. We are caught between the past and the future, confused, with no rhythm in our lives and unable to focus.

Are there any good parts of this astrological aspect?

The conflicts generated these days are easier to resolve. The consequences of unfortunate events or accidents are not severe. It is easier to get over psychological crisis. The good mood conquers immediately any state of tension, and harmony becomes a state of mind if we are relaxed.

The moon void of course periods are the perfect time to take the brake we need so much, to recharge our batteries. The sleep is restful and refreshing. Spiritual activities, reading, learning, meditating is recommended. It is important for us to observe ourselves during these periods, to make notes about our state of mind and events we are experiencing and to be in harmony with this lunar aspect. Don't try to turn against it.

Conclusions

We can draw the conclusion that moon void of course generates a declining or neutral trend on the financial markets, while a Moon fully engaged in a sign transmits the positive or negative influences the planets have at that specific time.

2. When did this astrological event took place in the past?

The moon void of course period ranges between a few minutes and two days. This variation makes difficult localizing the effects on the financial market.

This is a list of a few, randomly chosen void periods:

- a. Void from Monday, June 11, 2007 9:57 AM to Monday, June 11, 2007 1:29 PM
- b. Void from Friday, June 15, 2007 11:59 AM to Friday, June 15, 2007 3:45 PM
- c. Void from Tuesday, June 19, 2007 11:22 PM to Wednesday, June 20, 2007 2:45 AM
- d. Void from Monday, September 17, 2007 1:40 AM to Monday, September 17, 2007 2:21 PM
- e. Void from Monday, September 24, 2007 11:14 AM to Monday, September 24, 2007 2:55 PM

3. What was the effect on financial markets?

We will analyze each event and understand the evolution of DOW

Dharmik Team

www.FutureAnalyzer.com

- a. During the first period the market went down exactly at 9:57 AM and continued the descending trend. The graphic has a Time Frame of 15 minutes. After the void ended the market recovered.

- b. In the second example the void period started at 11:59 AM and the market descended a little. The price oscillated the entire day around the same price until 3:45 PM.

www.FutureAnalyzer.com

- c. The third example is a little more special. As we can see before the void of course the market had a Low. After that, the price began raising, probably because of a positive news. The void of course abolishes the positive result after the news. At the end of the period the price is lower that at the beginning. Right after the lunar period ends, at 2:45 PM, the trend “remembers” to raise. Is this a coincidence or pure harmony? You decide...

- d. The moon void of course took longer this day: from 1:40 AM to 2:21 PM. The entire day the Dow graphic showed a decrease. The price went down from the opening level, had a few ascensions and at the end of the day the price was lower that the previous day.

www.FutureAnalyzer.com

- e. The last example is very clear: “Void from Monday, September 24, 2007 11:14 AM to Monday, September 24, 2007 2:55 PM”. Before this astrological aspect the market had a strong ascension that any trader could bet it would continue. When the void started the market went down, abolishing the rise and bringing the price at a lower level than it started.

4. Conclusions

- a. There is a strong relation between this lunar period and the financial evolution. Usually, during moon void of course, the market stops rising and even descends.
- b. After the void ends, we will see a reversal point.
- c. We have also analyzed many past years and the rules apply. You can verify the correlation also if you are attracted to this kind of research work
- d. By showing you this study we are not trying to convince you that astrology is perfect. We just want to highlight the fact that there are correct ways of predicting the local High and Low and the reversal points. These kinds of studies helped us along the years build our trading system, the system we are basing our analysis and forecasts on.
